Who counts care?

Care is a broad concept. In this report we focus on care for people who need care for a long time and who need care and support in their daily life. This care is provided in various settings, such as nursing homes, residential care facilities, care farms, or in the home of the care recipient. We also include care for people who live independently but who need care and support in their daily life. We do not include care for people who live independently and who do not need care and support in their daily life.

Who counts care?

- Care for people who need care and support in their daily life, regardless of the setting in which this care is provided (nursing homes, residential care facilities, care farms, or in the home of the care recipient).
- Care for people who live independently but who need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.

Rules arrangements

Low conversion

- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
- Care for people who live independently and who do not need care and support in their daily life.
